

**You can tailor our affordable
“pick and mix” selection
of services to your needs**

Why use KU Solutions?

- ▶ KU has “been there, done that” – operating since 1895 we provide over 150 children’s services, enrich the lives of more than 11,500 children each year and employ in excess of 2,500 staff. We have experienced almost every situation a centre could face.
- ▶ All our services are individually priced at affordable rates so you only pay for what you need.
- ▶ Our consultants are specialists in their field and can provide expert, practical guidance.
- ▶ You can easily access the same online information and resources as KU centres use.

What is KU Solutions?

KU Solutions offers community-based early childhood centres practical, affordable solutions to some of the common problems they face. Our aim is to assist these centres in providing quality early childhood education and care for all children.

The resources, support and advice offered have been developed by KU Children's Services, drawing on the expertise gained since opening the doors of our first centre in 1895.

This experience in all aspects of delivering and managing high quality children's services has enabled us to provide thousands of children with a strong foundation for life long learning. KU Solutions can help you do the same.

How can we support you?

Using KU Solutions, community based, not-for-profit services can access and benefit from the same resources and support provided to KU's own centres including Online Services, Consultancy Services and KU's Professional Development Program.

Simply select the services that meet your needs and your budget - all our services are individually priced at affordable rates so you only pay for what you need.

For more information visit www.ku.com.au/kusolutions

Online Services

KU Solutions offers a suite of online resources which assist with key aspects of early childhood education and care. Either choose the individual areas that address your specific needs, or for a low annual fee you can gain unlimited access to the entire suite.

Some of these resources include:

- ▶ Policy documents required by Children's Services Regulations 2004 and for NCAC Accreditation
- ▶ Comprehensive policy resource documents which discuss their subject matter in detail, provide practical guidance and include forms and checklists, where appropriate, to assist policy implementation

Areas include:

- Guiding Children's Behaviour
- Child Protection
- OHS

- ▶ The KU Governance Health Check tool which helps organisations achieve better results through having a more effective management committee/board
- ▶ Other operational policies, detailed procedures and forms. These will assist centres to manage day to day issues such as staff grievances and sick leave

Consultancy Services

Our team of early childhood consultants can support your centre by providing professional, practical advice on all aspects of centre management, based on their experience working with KU centres.

The Consultancy Service can be tailored to meet your individual requirements, ensuring you receive information and support that best suits your needs.

Professional Development

The Professional Development service allows you and your staff to attend courses, seminars and workshops from KU's highly regarded Professional Development Program.

Experienced KU presenters are also available to provide selected training at your centre or other locations.

Tailoring your Solutions

Both our Consultancy Services and Professional Development Program can be selected independently - you do not need to purchase access to our online services to benefit from our consultancy support or professional development workshops.
